

In the claims:

1. (currently amended) An integrated garment comprising:
  - a) ~~an~~ a cut-and-sew outer layer comprising at least one of a long-sleeve shirt, a short-sleeve shirt, a dress, or a sweater for covering a woman's breasts, the outer layer including a top end, a bottom end and side seams; and
  - b) ~~an~~ a seamless inner layer having a perimeter and a substantial support structure extending from a front of the garment to a back of the garment in at least a bust region of the garment, wherein the inner layer includes at least two different stitch patterns each having a respective yarn and wherein the inner layer is substantially attached along at least a portion of the perimeter to the outer garment and is configured to substantially support the woman's breasts.
2. (original) The garment according to claim 1, wherein the stitch patterns comprise at least two of the following stitch patterns selected from the group consisting of:
  - i) a maximum support stitch, under the bust, at the sides of the bust, or between the breasts or mid section, or a combination thereof;
  - ii) a medium support stitch, in the back portion of the inner layer; and
  - iii) a soft selection area stitch, over the bust area.
3. (original) The garment according to claim 1, wherein the support structure includes at least two different yarns for imparting a support and control function to the support structure.
4. (original) The garment according to claim 3, wherein the yarns are selected from the group consisting of: cotton and microfiber each in combination with an elasticized material.
5. (canceled)
6. (original) The garment according to claim 3, wherein the yarns are selected from the group consisting of: spandex, bare spandex, nylon, nylon single cover, nylon flat shiny, viscose, polyester, acrylic, wool, cashmere, mohair and rayon.
7. (original) The garment according to claim 1, wherein the inner layer is substantially continuous around the circumference of the top end of the outer layer.

8. (original) The garment according to claim 7, wherein the inner layer is substantially attached at least substantially across the entirety of a perimeter of the top end of the outer layer.
9. (previously presented) The garment according to claim 1, wherein the inner layer is smaller than the outer garment and includes a shape substantially similar to a shape of a top half of the outer layer.
10. (original) The garment according to claim 9, wherein the inner layer is substantially attached to an inside of the outer layer.
11. (canceled)
12. (previously presented) The garment according to claim 9, wherein the inner layer is substantially attached to a perimeter of the top end of the outer layer.
13. (previously presented) The garment according to claim 12, wherein the inner layer is substantially attached to a perimeter of the top end of the outer layer, substantially around the arm holes and substantially across the shoulders.
14. (original) The garment according to claim 1, wherein the outer layer comprises a top with sleeves having a defined neck line.
15. (previously presented) The garment according to claim 14, wherein the inner layer is substantially attached to the outer layer substantially around an entirety of arm holes defined by the sleeves and to shoulder seams between the neckline and the sleeves.
16. (original) The garment according to claim 1, wherein the outer layer comprises a dress having a top half with or without sleeves.
17. (previously presented) The garment according to claim 16, wherein the inner layer includes a substantially similar shape as at least the top half of the dress, and wherein the inner layer is substantially attached to the outer layer at least at one common perimeter of the top end of the dress, around a neckline, around shoulder seams of the dress, or armholes of the dress.
18. (canceled)
